

```
#include<stdio.h>
#include<string.h>

int main()
{
    char str[20],ch;
    char *ptr;

    printf("\n\nEnter The String:\t");
    gets(str);
    printf("\n\nEnter Character To Be Found:\t");
    scanf("%c",&ch);

    ptr=strrchr(str,ch);

    if(ptr==NULL)
        printf("\n\nCharacter Is Not Found\n");
    else
        printf("\n\nCharacter Is Found At %d Location\n", (ptr-str)+1);

    return 0;
}
```
