```c
#include<stdio.h>
#include<string.h>

int main()
{
    char source[20];
    char destination[20];

    printf("\n\nEnter Source String:\t");
    gets(source);
    printf("\n\nSource String Is:\t");
    puts(source);

    strcpy(destination,source);

    printf("\n\nDestination String Is:\t");
    puts(destination);

    return 0;
}
```
